2. Description of the MMPI Escalator Plan Series 38

The Plan is an innovative new Investment Solution designed for investors who wish to invest in a Structured Retail Product that offers attractive potential investment returns linked to the performance of the shares of 3 companies that are potential Hard BREXIT Winners; and for investors seeking a risk-reducing mechanism to provide a degree of protection from normal stock market risk. The Plan is suitable as part of the process of constructing a genuinely diversified investment portfolio.

The Plan is in the form of Preference Share linked Certificates issued under BNP Paribas Arbitrage Issuance B.V.'s Note, Warrant and Certificate Programme. The Issuer's Base Prospectus dated 9 June 2016 (the Base Prospectus) provides the complete terms and conditions of the Certificates. A copy of the Base Prospectus is available from MMPI Limited on request.

This Plan is in the form of a Preference Share linked Certificate involving derivatives and is therefore a complex product. Investors should not invest in this Plan without having sufficient knowledge, experience and/or without having received professional advice from MMPI Limited to make a meaningful evaluation of the merits and risks of investing in a product of this type, and the information contained in this document and the Base Prospectus.

2.1 Investment Rationale

BNP Paribas' Equity Derivative Strategists have screened UK stocks that are the most likely to benefit from further GBP weakening in the wake of a harder than currently expected Brexit process.

BNP Paribas' strategists have designed a scoring system for investors who would like to select stocks that are likely to perform well if the GBP depreciates. The initial universe is the FTSE 350 Index, and the selection criteria are as follows:

The score is attributed based on a combination of 4 criteria:

1. Earning reporting currency (criteria weight: 40%): companies reporting in another currency than GBP get a higher score. This allows BNP to screen for companies which would potentially be affected by translation currency effects.
2. Exposure to North American market (criteria weight: 30%): higher score to companies which are more exposed to potential growth in the US and Canadian markets rather than the domestic UK economy. These stocks would also benefit from currency depreciation.
3. Performance since Brexit referendum (criteria weight: 15%): higher score for better stock performance to reaffirm the currency impact.
4. Realized correlation between stock performance and GBPUSD FX since Brexit referendum (criteria weight: 15%): higher score for stocks which have historically performed well when GBP depreciated vs. USD.

A liquidity ranking based on 2 indicators is applied on the top 30 scoring stocks:

1. Total option open interest (indicator weight: 50%).
2. Average volume of shares traded in the past 20 days (indicator weight: 50%).

This double screening gives the following 10 stocks which are the most likely to benefit from further GBP weakness:

	COMPANY NAME	SECTOR	EXANE BNPP VIEW VS SECTOR (OVER A 12-MONTH HORIZON)
BP/LN Equity	BP PLC	Oil and Gas	Outperform
GLEN LN Equity	Glencore PLC	Basic Resources	Outperform
ASN LN Equity	AstraZeneca PLC	Health Care	Neutral
AAL LN Equity	Anglo American PLC	Basic Resources	Neutral
HSBA LN Equity	HSBC Holdings PLC	Banks	Outperform
BLT LN Equity	BHP Billiton PLC	Basic Resources	Neutral
RDSB LN Equity	Royal Dutch Shell PLC	Oil and Gas	Neutral
STAN LN Equity	Standard Chartered PLC	Banks	Negative
RIO LN Equity	Rio Tinto PLC	Basic Resources	Neutral
SHP LN Equity	Shire PLC	Health Care	Outperform

There are 4 stocks from these 10 stocks which are the most likely to benefit from further GBP weakness that also have an "Outperform" Outlook from Exane BNP Paribas over the next 12 months. The 3 stocks in the Plan are those with the most attractive product payoff characteristics as follows:

- BP PLC
- Glencore Plc
- HSBC Holdings PLC

BP PLC

BP is a global energy company with wide reach across the world's energy system. BP has operations in Europe, North and South America, Australasia, Asia and Africa. BP's diverse portfolio is balanced across businesses, resource types and geographies. Having upstream and downstream businesses, along with well-established trading capabilities, helps to mitigate the impact of lower oil and gas prices. BP's geographic reach gives it access to growing markets and new resources, as well as diversifying exposure to geopolitical events.

2.2 The Target Market

MMPI Limited has targeted the Plan at investors who:

- Have received advice from their MMPI Advisor and for whom this Plan is appropriate and suitable.
- Have prior knowledge of investing in complex investments with capital at risk or have been advised by their MMPI Advisor regarding the risks and rewards of this type of Plan.
- Are able to bear loss of some or all of the capital invested.
- Are able to invest for the 5 year term.
- Expect the Underlying Investments to achieve moderately negative to moderately positive returns during the chosen term.
- Have a risk appetite consistent with the product risk score of 4.
- Can invest a minimum of €25,000.
- Understand that inflation will erode the future value of the amount invested and any investment return.
- Understand that the return of the initial investment amount and any investment return is depend on the creditworthiness of BNP Paribas and on the performance of the Underlying Investments.
- Understand that the opportunity cost of an investment in this Plan is the interest foregone as a result of not placing the investment amount in an interest bearing deposit account.

MMPI Limited does not consider the Plan suitable for and has not targeted the Plan at investors who:

- Have not received advice from their MMPI Advisor or have little prior knowledge of investing in complex investments with capital at risk.
- Are seeking an investment that is Capital Protected i.e. are not prepared to lose some or all of their original investment.
- Are unable to invest for a term of 5 years.
- Are seeking an income from their investment.
- Cannot invest a minimum of €25,000.
- Are uncomfortable that the taxation treatment of the Plan could change in the future and have an adverse effect on the return on the investment.

2.8 Fees & Charges

The Fees & Charges associated with the Plan are fully reflected in the terms. This means that they are built into the price paid for the Plan.

The total indicative commission payable to MMPI is 5% of the amount initially invested (based on market conditions on 16 May 2017). This commission amount will be reflected in the quoted price of the Plan if sold prior to maturity.

Warning: Deductions for charges and expenses are not made uniformly throughout the life of the Plan, but are loaded disproportionately onto the early period. If an investor sells the Plan prior to the end of the 5 year term, the practice of front-end loading will impact on the amount of money that the investor receives. The investor may not get back the full amount they invested.

2.9 What happens if I die before the Plan matures?

In the event of death of a sole investor or a surviving joint investor, the Plan may be held by the administrators of the estate until maturity. The proceeds from the sale of the Plan as a result of death will be paid to your Merrion Stockbrokers Limited Account or in the case of an insured pension or post retirement investor, to the investing life company.

Warning: Deductions for charges and expenses are not made uniformly throughout the life of the Plan, but are loaded disproportionately onto the early period. If an investor sells the Plan prior to the end of the 5 year term as a result of death, the practice of front-end loading will impact on the amount of money that the investor receives back. The investor may not get back the full amount they invested.
